Art Unit: 3765

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1,2 and 5-7, drawn to a diving mask, classified in class 2, subclass 439.
 - II. Claims 3 and 4, drawn to a process of manufacturing a diving mask, classified in class 264, subclass 1.7.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as performing a frame then heat shrinking the preformed frame onto the skeletal element(s).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Joe McKinney Muncy on March 17, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
